**Subject:** FW: WV hot issues - natl gov's assoc meeting

Here are the WV issues we thought you had already received. I am not sure if Mark sent them to Shawn directly or if maybe Mike shared them. Thanks, Amie

**Subject:** WV hot issues - natl gov's assoc meeting

There are the 3 hot issues I have vetted with staff - waiting for the okay from Shawn:

**\* Freedom Industries chemical spill (Jan 9)** - - The Region 3 Lab is providing analytical and technical support to remediation and eventual dismantling of the Freedom Industries site. Responding to a public confidence crisis, the state is standing up its own residential testing program using independent contractors.

**\* Patriot Coal slurry spill (Feb 11)** - - West Virginia Department of Environmental Protection has indicated the spill was the result of a valve failure and they have the situation under control, clean up efforts began quickly, and the state does not require EPA assistance at this time.

- \* **Buffalo Mtn/King Coal Highway** - - Adverse Rating: In June 2012, Region 3 provided an adverse rating of the King Coal Highway/Buffalo Mountain Draft EIS. The Region is coordinating with FHWA and the CORPS and anticipates reviewing the final SEIS in early Spring 2014.
